Le Ferre D'ITALIA

di Casa Giaretti

The atmosphere of the Italian countryside with its colours and flavours can be perceived in this range of extremely pleasing and innovative pans. The warm shades of olive and sage greens, brick and tobacco browns and ochre and pumpkin yellows are alternated and combined in the outer and inner coatings and on the handle.

The splendid label contains in a single image these warm emotions which come from the ancient traditions of the regions of Italy. The aluminium is about 3 mm thick in this range, the coloured non-stick coating is the technological innovation of this product, which is paired in a tone-on-tone contrast with the external colour, with the soft-touch handle and the relative flameguard.

Colours: dark/light green, dark/light brown, yellow/bronze

Colored flameguard
